## PERGOLA SYSTEMS / PERGOLA SİSTEMLERİ

**Yalcin Pergola Systems; It is an open & close system adapted to aluminum carriers and designed with special design fabrics. The pergola system motor, which uses RTS technology, works by remote control and the movement can be stopped at any point by using the start-stop technology. The entire system or a single module can be operated by remote control. Rain and wind sensors that can be added to the system detect situations such as precipitation and thunderstorms when the system is on and automatically turns off. Thanks to LED and strip lighting, it creates a 7/24 usage area. The hidden part of the drainage system, which is integrated into both beams and columns, makes it possible to drain rain and snow water.**

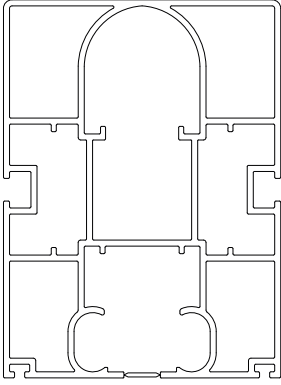

**Yalcin Pergola Sistemleri; alüminyum taşıyıcılar üzerine adapte edilmiş, özel tasarım kumaşlarla tasarlanmış açılır & kapanır bir sistemdir. RTS teknolojisi kullanan pergola sistem motoru, uzaktan kumanda ile çalışır ve start-stop teknolojisi sayesinde hareket istenildiği noktada durdurulabilir. Sistemin tamamını veya tek bir modülü uzaktan kumanda ile çalıştırılabilir. Sisteme eklenebilen yağmur ve rüzgâr sensörleri, sistem açık durumdayken yağış ve fırtına gibi durumları algılar ve otomatik kapanır. LED ve şerit aydınlatma sayesinde 7/24 kullanım alanı oluşturur. Drenaj sisteminin hem kirişler hem de sütunlar içerisine entegre olan gizli kısmı, yağmur ve kar suyunun tahliye edilmesini mümkün kılmaktadır.**
